

MS Drugs under Control (Designer Drugs)

Dr. Peter Roesner

*Regional Department of Criminal Investigation Kiel
Kiel, Germany*

The collection contains 2,959 chemical compounds and 3,437 mass spectra. All new designer drugs that appeared on the market up to October 2004 are included. In reaction to recent terrorist activities, about 100 chemical warfare agents (Sarin, Tabun, etc.) have been added to the collection.

In addition to structural formula and spectrum, the following information is available:

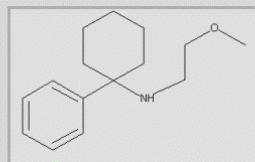

- Chemical structure
- Chemical name
- Molecular formula
- Molecular weight (Nominal mass)
- Biological effect
- Measurement conditions

Designer Drug
PCMEA
(Hallucinogen)

Mass Spectrum

Key Features:

- Search by structure and substructure
- Search by spectrum
- Search by various spectral features
- Current information - contains the latest information about designer drugs worldwide
- Quality controlled

Availability:

- JCAMP DX
- Finnigan Standard Library Format
- Excalibur
- NIST
- HP Chemstation
- HPJCAMP
- MSP
- Other formats on demand
